

3DTV CON 2007 Presentation guidelines

Poster Presentations

Posters should be designed to take advantage of the interactivity and discussion that is typical of poster sessions. They should attract attention, provide an overview of the work and initiate discussions.

Posters should be prepared for **A0 size**, in **portrait format**. The title of your paper and the author names should be printed in large characters (point size 72 recommended) at the top of the poster. The remaining text in the poster presentation should be easily visible from a distance of about one meter (point size 24-48 recommended).

Avoid putting too much material and text on the poster. Bulleted lists and graphics are often more effective. Graphics help make your poster interesting. Use graphs, diagrams, tables and cartoons wherever possible. A brief textual description of the implications of a graphic, placed just above or below it, is often helpful.

Oral Presentations

Each paper will be allocated **15 minutes of time**. Please make sure that your presentation does not go over 13 minutes, leaving time for questions. The session chairs are instructed to stick to the schedule and may interrupt your prolonged presentation.

Each room will have an LCD projector, a laser pointer, a screen, and audio system if it is necessary due to the room size.

Authors need to bring their laptops, power card and any other items and check before hand that their system is compatible with audio-visual equipment.
